General Information

- TOURNAMENT-READY PLUS PELLET with actosol contains two proven ingredients: Tournament-Ready and actosol.

- TOURNAMENT-READY PLUS PELLET with actosol is packaged in a convenient system for supplemental treatment of highly maintained turf areas. Tournament-Ready will effectively treat localized dry spot (LDS) in a range of soil types and turf varieties.

- Combined with actosol, this product will help alleviate stress by improving plant available nutrients, increase CEC and chelation of plant nutrients, improve photosynthesis, and aid soil in more moisture holding capacity.

- The combination of Tournament-Ready and actosol make an excellent choice for seed establishment starting with increased water-holding ability, increased nutrient availability and freeing up unavailable phosphorus.

Directions For Use

For Golf Course Greens, Tees and Other Highly Maintained Turf Areas

Using available commercial in-line hose applicators, remove the plastic lid, insert the TOURNAMENT-READY PLUS PELLET with actosol and the plastic jar into the reservoir of the hose-end applicator with the opening of the jar containing the pellet facing toward the flow of water. Secure the reservoir to the applicator and begin application. Inserting the jar with the pellet facing away from the water flow will slow the rate of erosion of the pellet thereby reducing the amount of wetting agent dispersed over time. This is an acceptable option for minimizing wetting agent use.

Use Rate: Place one pellet into an applicator. Apply 2 to 4 minutes per 1,000 sq. feet (100 sq. meters) of turfgrass. Treat weekly or as needed. Reapply TOURNAMENT-READY PLUS PELLET with actosol as preventative treatment or follow-up maintenance in conjunction with regular turf management programs.
